See Debut of Industrial Managed PoE+ Switch & Compact Embedded Gigabit Switch Module in 2007 Computex

Korenix welcomes you to visit 2007 Computex Taipei from Jun.5~9. Korenix launches [Three World First](#) products in our Computex booth.

The world first PoE plus Ethernet Switch, **JetNet 3706 / 4706** series, can send up to 30W high power per port and support both 24V / 48V power inputs for vehicles and industrial surveillance.

Korenix **JetNet 5008G-P** is the first world compact size embedded Giga switch modules supporting -10~70°C operation temperature.

Korenix **JetPort 5604** features the first redundant serial server with high management security and industrial digital inputs and digital outputs.

JetNet 4706 Industrial 6-port Managed PoE+ Switch

- 4 PoE+ and 2 Redundant Uplink Ports
- PoE+ High Power 30W / port
- Supports 24V and 48V PoE
- PoE Hour / Week Schedule
- Auto Reset Powered Device
- Rapid Super Ring Recovers Network in < 30ms

June 5-9,2007

Hall 2, E018

JetPort 5604 Redundant RS232/422/485 I/O Device Server

- Four RS232/422/485
- Four Digital Inputs and Two Digital Outputs
- Dual Ethernet Recovers Network in < 200ms
- Dual 12~48VDC Power Inputs HTTPS/SSH Security

JetNet 5008G-P Embedded Gigabit Managed 2G + 6 10/100 Switch Board

- Two Giga RJ45 / SFP Combo Ports
- Six 10/100 and one 10/100/1000 Uplink Ports
- 14 x 20cm Compact Size
- Low Power Consumption < 10W
- SNMP, Web, CLI, Console, Telnet, Windows Management
